ABSTRACT

The tables in this report summarize statistical information for schools and education agencies as supplied to the National Center for Education Statistics (NCES) by state education agencies. Information comes from the 1989-90 school year Public Elementary and Secondary School Universe and the Public Elementary and Secondary Education Agency Universe surveys of education in the United States. These surveys are part of the Common Core of Data collected annually by the NCES. A section of definitions and abbreviations precedes the tables of data. Seventeen tables provide the following data: (1) number and percent of public elementary and secondary schools (PESSs) by type and state; (2) number and percentage distribution of students in PESSs by type of school and state; (3) distribution of regular PESSs with student membership by membership size and state; (4) number and percentage distribution of PESSs by school-size category and state; (5) number and percentage distribution of PESS students by school-size category and state; (6) number and percentage distribution of students in PESSs by grade ranges and state; (7) percentage distribution of PESSs providing instruction by specified grade span and state; (8) number of PESSs of specified instructional levels by state; (9) mean number of students per school in PESSs of specified instructional levels by state; (10) median pupil-teacher ratios in PESSs with student membership of specified instructional levels by state; (11) selected characteristics of PESS membership by state; (12) number and percent of PESS education agencies by type of agency and state; (13) distribution of regular PESS districts and students by membership size; (14) number of regular PESS districts by grade span and membership size; (15) number of regular PESS districts by grade span and state; (16) number of regular PESS districts by membership size and state; and (17) distribution of regular PESS districts with student membership by membership size and state. Two appendices provide survey sample forms. (SLD)

Public Elementary and Secondary Schools and Agencies in the United States and Outlying Areas: School Year 1989-90

This report is based on information from the 1989-90 school year "Public Elementary and Secondary School Universe" and the "Public Elementary and Secondary Education Agency Universe" surveys of education in the United States. These data represent two of the surveys from the Common Core of Data (CCD) collected annually by the U.S. Department of Education's National Center for Education Statistics (NCES). The tables in this report summarize statistical information for each school and education agency as supplied to NCES by state education agency officials.

Methodology

The sources of data for this report are the surveys, "Public Elementary and Secondary School Universe" and "Public Elementary and Secondary Education Agency Universe." Responses to these surveys were received by NCES from state education agencies in the spring and summer of 1990. The data used here represent information incorporated into the files as of October 19, 1990. Data from the 50 states, the District of Columbia, and five outlying areas are included. Information from the outlying areas is shown in the tables, but is not included in the United States totals.

Data for this report were provided by state education agencies from administrative records in their offices. NCES and the state education agencies work cooperatively to assure comparability between data elements requested and reported. In December of 1989, pre-completed school and agency surveys were sent to each state education agency CCD Coordinator (sample survey forms are shown in the appendices to this report). Updated reports were returned by the coordinator to NCES, which edited these submissions to identify missing data or what appeared to be unusually large changes from the previous year's values. Edit reports were then sent to the states for verification or correction before the September 1990 cut-off date.

In this report, state totals of student membership are taken from the "State Nonfiscal" survey, while distribution of membership among the various school categories is calculated from individual school records in the "Public Elementary and Secondary School Universe" survey.

Assigning Student Counts for Reporting Purposes

Both the school and agency surveys have legitimate records that have no student counts. Schools offering special programs, such as special or vocational education, often operate as adjuncts to regular schools. In these situations, personnel accounting procedures may call for all students--and in some cases, teachers--to be counted in the regular school, with the result that the special school has a count of

zero. Some regular school districts contract with other agencies to provide services for some students rather than operate schools for these students directly. In this case, student counts are not reported for the receiving district in order to avoid duplication. Conversely, in cases where all students are served by a receiving district, no student counts are reported for the sending district.

Student counts are also generally not attributed to supervisory union administrative centers or regional education service agencies. Some of the tables in this publication include only records with students reported. Readers should note this when using data from these tables.

Missing Data

Missing or unavailable data are represented by the symbol "---" in the tables. Data are shown as missing when they are reported by less than 70 percent of the schools or agencies (whichever is the appropriate reporting unit) in a state. This is the case with two characteristics, the racial/ethnic composition of a school's student membership and the number of students eligible for free lunch services. When a data element is missing for one or more states, table totals are not computed.

Definitions and Abbreviations

Alternative education school--A public elementary/secondary school that addresses needs of students which typically cannot be met in a regular school. It provides nontraditional education and may be adjunct to a regular school.

Education agency--Government agency administratively responsible for providing public elementary or secondary instruction, or both, or educational support services.

Federally-operated agencies--Any elementary, secondary, or combined education program operated by a federal agency (such as the Bureau of Indian Affairs) reported by the state CCD Coordinator.

K--Kindergarten.

Other agencies--Any elementary, secondary, or combined education program that cannot be appropriately classified using another CCD designation and that has been reported as such by the CCD Coordinator. In this report, these are grouped with Federally-operated agencies.

Public school--Institution that provides educational services, has one or more grade groups (PK-12) or is ungraded, has one or more teachers to give instruction, is located in one or more buildings, has an assigned administrator, receives public funds as primary support, and is operated by an education agency.

PK--Prekindergarten.

Public school membership--The unduplicated count of students on the roll of the school or district (excluding any formally enrolled students who withdrew from school), taken on the school day closest to October 1, 1989.

Regional education service agencies (RESA)--Agencies that provide special services to other public elementary and secondary education agencies.

Regular school--A public elementary/secondary school that does not focus primarily on vocational, special, or alternative education.

Regular school districts--Agencies responsible for providing free public elementary and secondary education for school-age children residing within their jurisdiction. These agencies sometimes include special and vocational education in a comprehensive educational setting.

School district--Education agency or administrative unit that operates under a public board of education.

Special education school--Public elementary/secondary school that focuses primarily on special education, including instruction for any of the following: hard of hearing, deaf, speech impaired, health impaired, orthopedically impaired, mentally retarded, seriously emotionally disturbed, multihandicapped, visually handicapped, deaf and blind; and has adapted curriculum, materials, or instruction for students served.

State education agency--The agency of the state charged with primary responsibility for coordinating and supervising public instruction, including the setting of standards for elementary and secondary instruction programs.

State-operated agencies--Any elementary, secondary, or combined education program operated by a state agency (such as state schools for the blind or deaf) reported by the CCD Coordinator.

Supervisory union administrative centers--Agencies that provide administrative services for a group of small school districts.

Vocational education school--Public elementary/secondary school that focuses primarily on vocational education, and provides education and training in one or more semi-skilled or technical occupations.

Acknowledgments

The authors gratefully acknowledge the comments and suggestions of the reviewers: Mary Frase and Peggy Quinn of the National Center for Education Statistics; and Barbara Clements of the Council of Chief State School Officers. The authors also acknowledge the contributions of Susan Ahmed, Chief Statistican for the National Center for Education Statistics; Marilyn McMillen, Frank Johnson and Jo Ann Davis of the National Center for Education Statistics.
